```
This file contains a template for package 0.doc files.  See
   lang/lisp/code/iter/series/0.doc
for a filled out example.

================================================================
Package:      Directory in which the package will be placed.
              Leave this field blank, unless you have a suggestion for
              the location.

Name:         Formal name of the package, if any. Should be short --
              one or two words at most.

Summary:      Short 1-2 line description of the package.

Version:      Version number and date. Use the format: 2.3 (23-MAY-94)

Description:

   Extended description of the package. May be several paragraphs
   long, but should be kept shorter than a page. Descriptions longer
   than a page should be put in a separate README file.

Requires:     Any special software requirements. For example, some
              GUIs require CLX. Also include programming language
              dependencies here (e.g., "Common Lisp", "C", "awk").

Ports:        Supported environments/platforms to which the package
              has been ported (e.g., "Lucid CL (SunOS)") and portability notes.

Origin:       Definitive FTP site and directory of the package. Use
              the following format:
                 ftp.cs.cmu.edu:/user/ai/new/
                 as the file package.doc

Copying:      Summary of the package's copyright and any copying restrictions.
              Extended copyright information should be included somewhere
              in the package say in a file named COPYING, COPYRIGHT, LICENSE
              or something similar.

              If the package is in the public domain, write "Public Domain"
              here.

              If the package is covered by the GNU General Public
              License, include a "Copyright (c) 19?? by ???" line here and
              follow it with "GNU GPL v1" or "GNU GPL v2", as appropriate.

              Mention if you would like to get an email message or postcard
              from any users.

Updated:      Leave this line blank.

CD-ROM:       Prime Time Freeware for AI, Issue 1-1

Bug Reports:  Where to send bug reports.

Mailing List: Email address of the user's group mailing list or newsgroup,
              followed by the address for subscription requests and
              *brief* instructions on how to subscribe.

Author(s):    The names of the package authors, including their email
              addresses. Use the format: Mark Kant <mkant@cs.cmu.edu>
              If there is a single author, include postal address,
```

telephone, and other information here.

Contact: If the official contact for the software is different from the authors, or there are several authors, list the primary contacts here, along with their email addresses, postal addresses, telephone numbers, and other information, as desired.

If you do not wish to be contacted, state so here, but please include the contact information so I can get in touch with you. If you don't want it listed in the 0.doc file, tell me and I'll remove it.
